PROFESSIONAL SUMMARY

3rd-Year B.Tech Information Technology undergraduate (CGPA: 9.35) and React Native Developer at Truck Hai with production experience across full-stack mobile, microservices, and Computer Vision AI systems. Proven expertise in building high-throughput REST/gRPC backend services in Go, modular React 19/Next.js platforms, edge AI inference (YOLOv11), and automated CI/CD Docker pipelines adhering to Agile SDLC standards.

TECHNICAL SKILLS

Languages & Frameworks:	TypeScript, JavaScript (ES6+), Go (Golang), Python, React Native, Expo, React 19, Next.js 14, Node.js, FastAPI, Tailwind CSS
AI & Computer Vision:	YOLOv11, OpenCV, Scikit-Learn, XGBoost, Time-Series Forecasting, Feature Extraction, GIS Spatial Geotagging
Backend & Cloud:	PostgreSQL, MongoDB, Prisma ORM, RESTful APIs, BFF Architecture, JWT Authentication, Redis, Firebase
DevOps & Tooling:	Docker, Multi-Stage Builds, GitHub Actions, CI/CD Pipelines, Git, Vercel, Render, Linux/Bash, Agile Sprints

WORK EXPERIENCE

React Native Developer (Internship) <i>Truck Hai · Logistics & Freight Mobility</i>	Jul 2026 – Present Remote India
• Cross-Platform Mobile Engineering: Architected and shipped core driver & fleet interfaces using React Native, Expo, TypeScript, and Go microservices. • High-Throughput Backend & DB: Engineered low-latency Go REST endpoints and structured PostgreSQL relational schemas for active dispatch logging. • Agile Velocity: Participated in weekly Agile sprints, pull request reviews, and continuous unit testing to accelerate driver dispatch features.	
Web Developer Intern <i>The Skybrisk · Enterprise Business Systems</i>	Feb 2026 – Apr 2026 Remote
• Enterprise ERP Platform: Engineered modular ERP modules in MERN Stack and Material-UI supporting inventory, invoicing, and client records. • RBAC Security Engine: Designed a multi-tier Role-Based Access Control authorization middleware securing sensitive business workflows.	
Full Stack Intern <i>RMkart · ShopSphere E-Commerce Platform</i>	Feb 2026 – Mar 2026 Remote
• BFF Architecture & Performance: Transitioned endpoints to Backend-for-Frontend (BFF) pattern, reducing client payloads and cutting load times by 30%. • Secure Auth: Implemented JWT session token rotation and stateful cart checkout flows with Vite-optimized React UI.	
Full Stack Web Development Intern <i>Corizo Edutech Pvt. Ltd.</i>	Jun 2025 – Aug 2025 Remote
• Built full-stack CRUD applications integrating authenticated REST APIs, Firebase real-time sync, and responsive UI components.	

KEY ENGINEERING PROJECTS

IndiaX — Farm Chemical Intelligence Platform SIH 2026	GitHub Live Demo
• Architected a farm-level chemical intelligence platform connecting 7 trained Scikit-Learn/XGBoost models to predict PHI compliance (100% precision). • Built FastAPI inference gateway, Prisma ORM PostgreSQL schemas, and interactive TypeScript dashboards for regulatory violation tracking.	
RoadGuard AI — Real-Time Municipal Pothole & CCTV GIS Tracking	GitHub
• Developed an edge computer vision pipeline with YOLOv11 & OpenCV achieving <45ms frame inference on 1080p municipal CCTV feeds. • Integrated Leaflet GIS spatial mapping to automatically cluster road damage severity and optimize municipal repair crew dispatch.	
AutoShip Pipeline — Automated DevOps CI/CD Ecosystem	GitHub
• Implemented automated matrix test runners & container builds using Docker multi-stage images, cutting artifact footprint by 65%. • Created GitHub Actions deployment workflows with zero-downtime container rollouts and automated rollback triggers.	

EDUCATION & CERTIFICATIONS

B.Tech in Information Technology · 3rd Year Undergraduate <i>Saveetha School of Engineering, SIMATS University Chennai, Tamil Nadu</i>	2024 – Present CGPA: 9.35 / 10.0 (Top 5%)
• Certifications: NPTEL Elite Certification in Internet of Things (IoT) Google Cloud & IBM Machine Learning Badges
